

Problem Statement

Problem Statement:

- Tracking all the grades from different classes is hard

Who is experiencing the problem:

- Any student who has teachers that use multiple websites other than blackboard

What is the problem:

- Keeping track of assignments and grades for different classes is tedious and unnecessary

Where does the problem present itself:

- When a student wishes to check their grade and they have to go through multiple websites

Why does it matter:

- Checking grades less often due to having to search for them can cause the student to have lower grades. For example, if a student believes they are doing well in class, they are less likely to study as hard as a student who is aware they are not doing well
